

COMMUNITY COLLEGE OF ALLEGHENY COUNTY
PURCHASING DEPARTMENT
800 ALLEGHENY AVENUE, PITTSBURGH, PA 15233

ADDENDUM 1
BID PROPOSAL NO. 1135
ADDITIONAL POWER AND COMPRESSED AIR FOR CEIT BUILDING
DECEMBER 20, 2024

The following additional information is hereby made a part of this bid:

See attached suggested surface/concealed conduit routes (E-102).

See the accompanying four drawings showing fire wall locations (G-101, G-102, G-103, and G-104).

Various questions and answers:

In the Specs Section 262713 Electricity Metering - Do we need to add this to Panel LB-2BB since this is a Sub-panel to Panel LB-2B which has a metering device?

BHE - No; Panel LB-2BB does not require a metering device.

Is it the expectation in rooms 220 and 222, that all the conduits be surface mounted on walls in EMT conduit except where we need to enter Panel LB-2B?

BHE-Conduit will need to be surface-mounted in EMT conduit on exterior walls and fire-rated stair walls. Pathways and conduit should be concealed in interior walls. The south wall of Lab 222 has an additional layer of material which allows for concealment. Please see notes 2, 5, and 7 on Drawing E-102.

What are the start and completion dates? Are there any liquidated damages

There are no specific start or completion dates listed. We request that the contractor(s) start work shortly after award in January and keep working until completed. There are no liquidated damages.

End of Addendum 1

Sign addendum and return to the College with your response.
